European Standard Contract for Coffee (ESCC)

It was in September 1956 that the Committee of the European Green Coffee Merchants Associations (CEGCMA) published the first European Contract for Coffee (ECC).

It was primarily intended for use between producer exporters and the trade in Europe. Individual trade associations had been using, and continued to use, their own standard contracts. Gradually though, with an increasing amount of trading within Europe, the ECC became the recognised default contract.

There was a call within the trade for a spot contract and in January 1983 the Committee of the European Coffee Associations (CECA), the successor to the CEGCMA, brought into effect the European Contract for Spot Coffee.

Up until this time, members of CECA had been meeting on an informal basis to discuss contractual matters but at its 1983 Annual General Meeting in Lille it agreed to establish a formal Contracts Commission.

There followed, effective January 1995, the European Contract for Coffee in Bulk but in 2002 this contract was incorporated into the ECC.

Whilst it was generally the green trade that historically had overseen contractual conditions, with changing purchasing methods and the establishment of their own specific conditions, manufacturers took an increasing interest in the standard contracts. For a period, representatives of EUCA (the European Association of Coffee Roaster Associations) attended meetings of the Contracts Commission.

Formed in 1981, the ECF was the voice of CECA and EUCA when the two associations agreed to speak as one. However, in 2005 they both agreed to disband and the ECF adopted statutes establishing itself as the European body for the whole trade and industry.

A consequence of this was that the two CECA standard contracts came under the authority of the ECF with a formal Contracts Committee being established.

Thereafter, in 2012 the ECF published the European Delivery Contract for Coffee (EDCC) and the Free Carrier Contract (FCA).

Clearly, it was not an ideal situation whereby the ECF published four separate standard contracts and subsequently the Contracts Committee was given the task of amalgamating the contracts into one. This resulted in the ECF European Standard Contract for Coffee (ESCC).

The ECF publishes a Code of Practice to which reference may be made as a guide to the interpretation of the contract.

Only the English version of the ESCC shall be official.

There are basically three types of contract covered by the ESCC:

1. Shipment

Such contracts will usually be under FCA, FOB, CFR or CIF terms. Although under an FCA contract the sellers' responsibility ends upon delivery at the named place, the buyers must ship the goods within a stipulated period to benefit from the sellers' obligations under weights and quality.

Generally, FCA contracts will be made basis "loaded weight" and FOB, CFR and CIF contracts will be made on a "shipped weight" basis (or alternatively "landed weight" for CIF sales).

As mentioned, the first standard European contract which was adopted was the ECC.

At the time, it was noted that in the coffee trade, even if the price is expressed "Free on Board port of shipment", the contract is in fact to be considered as an ill-defined Cost and Freight contract, the freight being for account of the buyers.

Consequently, Free on Board sellers will not only have to reserve space but are equally responsible for the actual shipment of the coffee. They must also establish all necessary shipping documents. Therefore, their responsibility ends only at the moment the coffee crosses the ship's rail, precisely as in a Cost and Freight contract. However, in view of the fact that this constitutes a deviation from general trade practice, this obligation had to be clearly stipulated in the contract.

If buyers wish to buy on effective Free on Board conditions they will have to state this prior to conclusion of the contract and give the necessary instructions to the sellers in due time.

Shipment contracts basically cover movement of coffee from the port of shipment to the port of destination. However, it has to be recognised that it is common for buyers to arrange for on-carriage of coffee without stripping the container and reloading. Therefore, buyers have the right to arrange for on-carriage of containers on the stipulated conditions.

2. Delivery

These contracts are generally envisaged to be made for coffee for delivery at an agreed place in Europe basis in/ex store or FCA. The coffee eventually tendered under a delivery contract will not necessarily be already lying in Europe at the time of sale and, importantly, any failure by the sellers to obtain coffee does not release the sellers from the obligation to tender.

3. Spot

Spot coffee is coffee lying in a warehouse in Europe at the time of sale. Usually, the conditions will be in/ex store, FOB, FCA, DAT, DAP or DDP.

SHIPMENT

Article 1 - Quantity

The quantity shipped or loaded shall be that stated in the contract.

A tolerance of 3% in weight, more or less, shall be permitted only if the difference is due to circumstances beyond the control of the sellers.

Article 2 - Weights (where coffee is sold "shipped weight" or "loaded weight")

- (a) The invoice shall be made out on the basis of the shipped or loaded weight established:
 - (i) at the time and place of shipment or delivery, or
 - (ii) at the time and place of stuffing whenever the coffee is stuffed into the shipment containers at an inland location.

In either case, sellers shall provide independent evidence of weight.

- (b) The parties can agree that weights be final together with the procedure and conditions that shall apply.
- (c) The actual shipped or loaded weight shall be stated in the bill of lading or carrier's receipt.
- (d) Any loss in weight, as ascertained in accordance with Article 3(c) or 3(d), in excess of 0.5% of the invoice weight shall be refunded by the sellers.

Claims shall be made, supported by a detailed weight note certified by an independent recognised weigher, as quickly as possible but not later than 28 calendar days from the date of weighing.

For coffee in bags or big bags (FIBCs - flexible intermediate bulk containers) claims shall be calculated on the net weight of the sound full bags landed but applied to the whole parcel.

Provided intermediaries and buyers/sellers of the same parcel forward a claim not later than 2 working days after receipt such claim shall be considered to have been made in time.

Article 3 - Weights (where coffee is sold "landed weight")

- (a) The provisional invoice shall be made out on the basis of the shipped weight established:
 - (i) at the time and place of shipment, or
 - (ii) at the time and place of stuffing whenever the coffee is stuffed into the shipment containers at an inland location.

In either case, sellers shall provide independent evidence of weight.

- (b) The actual shipped weight shall be stated in the bill of lading.
- (c) Coffee in Bags or Big Bags (FIBCs):

The coffee shall be weighed upon discharge from the container at the buyers' expense not later than 21 calendar days from the final date of discharge at the port of destination, in conformity with local custom³.

³ Amendment effective for contracts concluded on or after the 1st March 2021.

Slack bags shall be weighed separately and individually.

In the event that coffee is discharged into a silo without prior weighing, a silo weight note must be issued stating specifically whether the coffee was weighed before or after cleaning. If the coffee is weighed after cleaning, the weight of the admixture and of the coffee extracted must be shown on the weight note.

Failure to abide by these stipulations shall permit the sellers to regard the shipped weight as final.

(d) Coffee in Bulk:

The coffee shall be weighed either upon discharge into silo or on a weighbridge at the buyers' expense not later than 21 calendar days from the final date of discharge at the port of destination.

A silo weight note must specifically state whether the coffee was weighed before or after cleaning. If the coffee is weighed after cleaning, the weight of the admixture and of the coffee extracted must be shown on the weight note.

In respect of weighbridge weighing, the container must be weighed both full and empty on the same weighbridge within two working days. The weight note shall state:

- (i) that the trailer unit was the same on each occasion;
- (ii) that the tractor unit was disconnected and was not weighed;
- (iii) whether the weight of the liner and any packing support is included following discharge of the coffee.

Failure to abide by these stipulations shall permit the sellers to regard the shipped weight as final.

(e) Where the goods are unavailable for weighing for any reason beyond the control of the buyers, the above time provision shall be extended and counted from the date the goods are available.

(f) The buyers shall forward to the sellers a detailed weight note certified by an independent recognised weigher, as quickly as possible but not later than 28 calendar days from the date of weighing, failing which the shipped weight may be regarded as final.

Provided intermediaries and buyers/sellers of the same parcel forward a weight note not later than 2 working days after receipt, such weight note shall be considered to have been forwarded in time.

(g) Coffee in Bags or Big Bags (FIBCs):

Sellers are not obliged to accept a weighbridge weight note.

Article 4 – Supervision (Weights)

(a) The buyers can require the weight of shipment or loading to be supervised, provided they give notice to the sellers in due time and bear the costs thereof. The supervisors' certificate of weight should be included with the shipping documents; however, sellers' failure to do so shall not entitle buyers to reject documents.

(b) The sellers can require the weighing to be supervised at the port of destination, provided they give notice to the buyers in due time and bear the costs thereof.

(c) Where supervisors have been appointed, weighing and taring may be carried out if the

supervisors, though informed in good time of the place and time of weighing and taring, are not present. Such weight and tare must then be accepted.

Article 5 - Packing

(a) Coffee in Bags:

The coffee shall be packed in sound uniform natural fibre bags suitable for the transport of coffee, i.e. sound bags which are in external good order, woven from natural fibres, of sufficient strength to withstand transit and storage, previously unused, clean, suitable for food contact use and suitable to be packed in a 20' general purpose container.

(b) Coffee in Bulk:

The coffee shall be stuffed in a 20' general purpose container suitable for the transport of coffee with a suitable liner, i.e. constructed using material such that it prevents damage from condensation, of sufficient strength to withstand transit, previously unused and clean

(c) Coffee in Big Bags (FIBCs)

The coffee shall be packed in big bags, having a gross weight of more than 500kg, suitable for the transport of coffee, i.e. constructed using material such that it prevents damage from condensation, of sufficient strength to withstand transit and storage, previously unused, clean, sealed and suitable to be packed in a 20' general purpose container.

(d) Any packing material shall be in conformity with the legal requirements for food packaging materials and waste management within the European Union valid at the time of conclusion of the contract.

(e) Any additional costs incurred owing to any difference or change in requirements are for buyers' account.

Article 6 - Tare

(a) Coffee in Bags and Big Bags (FIBCs):

Actual or customary tare shall be deducted in the invoice. The tare shall be ascertained where necessary by taking the average of 5 empty bags chosen at random.

(b) Coffee in Bulk:

The actual liner tare as well as the weight of any packing support, e.g. wood, shall be shown in the invoice.

Article 7 - Quality

(a) Quality shall be in accordance with the contract description.

(b) All goods contracted for shall be of sound merchantable quality unless otherwise stated in the contract or shown to the contrary by the sale sample or samples.

(c) Any difference in quality established by arbitration shall entitle buyers to an allowance which may include compensation for costs and expenses.

(d) Where there is specific evidence that the coffee is unsound and/or there is a radical difference in quality, the buyers may seek an allowance or that the contract be discharged by invoicing back the coffee. One criterion as to whether coffee is unsound is an excessive moisture level.

Where arbitrators establish that the coffee is unsound and/or there is a radical difference in quality, in awarding invoicing back, they shall establish the price having in mind all the circumstances concerned.

Where arbitrators establish that the coffee is not unsound and/or there is not a radical difference in quality, they may award an allowance which may include compensation for costs and expenses.

Article 8 - Samples

- (a) Samples for arbitration purposes shall be drawn and sealed by an independent qualified body, not later than 28 calendar days from the final date of discharge at the port of destination.
- (b) Coffee in Bags and in Big Bags (FIBCs):

 - (i) by hand whilst the container is being discharged, or
 - (ii) by a mechanical automatic system prior to cleaning of the coffee.
- (d) Where the goods are unavailable for sampling for any reason beyond the control of the buyers, the above time provision shall be extended and counted from the date the goods are available.
- (e) The sellers can require the drawing and sealing of samples by an independent qualified body to be supervised, provided they give notice to the buyers in due time and bear the costs thereof.
- (f) Where supervisors have been appointed, sampling may be carried out if the supervisors, though informed in good time of the place and time of sampling, are not present. In such an event, the samples drawn and sealed by an independent qualified body shall be accepted by the sellers. Should the buyers fail to inform the sellers' supervisors, they forfeit the right to any claim based on quality.
- (g) Each container shall be represented by a separate sample.
- (h) Where a container contains more than one quality, each quality shall be represented by a separate sample.

Article 9 - Freight

Where the price is fixed Cost and Freight or Cost, Insurance & Freight, the sellers shall pay the costs and freight necessary to bring the coffee to the named port of destination. Any additional charges due to events occurring after the time of shipment shall be for buyers' account.

Freight includes any charges additional to the actual freight rate however levied, covering such as exchange adjustments, bunkering or congestion surcharges or any other additional charges incurred under the contract of carriage, whether or not expressed in the bill of lading.

Article 10 - Declaration of Port of Destination or Point of Delivery

Should the delay cause any loss to the sellers they shall be entitled to claim damages.
- (d) Where a declaration of destination or point of delivery and name of carrier is not received within the time limit as stipulated under Article 10(a) or (b), the following procedure shall be adopted.
 - (i) Not later than 7 days after the time limit as stipulated under Article 10(a) or (b) the sellers shall advise the buyers accordingly and give 3 clear working days' notice that in the event of a declaration of destination or point of delivery and name of carrier not being received they will have the right to declare the buyers to be in default with damages.
 - (ii) Should a declaration of destination or point of delivery and name of carrier still not be received, the declaration of default shall be given not later than 2 working days following expiry of the notice period, as stipulated in Article 10(d)(i).
